

Dear Valued Hymed Customers:

We are pleased to remind you that Hymed Skin Care lines are fully compliant with Proposition 65. In the process of achieving this compliance we have replaced some ingredients with even better ingredients. If you notice that your favorite products now have a newer set of ingredients and look and smell different, please know it is for the better.

May we also remind you that our products are free of artificial fragrances and so there can be variations in smell. Further, our products are natural and plant-based, and we do not use chemicals to standardise the look and feel of our products. Thus, you may notice a slight change in color, consistency or smell of the products but the performance of these new ingredients is the same if not better.

As always, our mission is to create the safest and cleanest skin care products possible with your health and wellness always being our number one priority.

Thank you always for your loyalty and support!

In Health and Wellness,

The Hymed Team
